Description	
<i>Provide a short description of the event and its activities.</i>	

The project aims to strengthen civic engagement through the development of town twinning. The target of the project is the IV. Győr Climate EXPO. This Town Twinning project will strengthen the twinning links between Győr and the

project partners Colmar, Csíkszereda, Ingolstadt, Sindelfingen, Poznan and Dunaszerdahely.

One of the main challenges of our time is to react to climate change, to fight against extreme weather events and to mitigate the negative impacts on our environment. It is important to minimise the negative impacts on our planet in order to protect the ecosystem.

The direct target group of the project are the delegations of the participating project partners, who have experience in the field of climate protection and environmental protection and can therefore be the main actors in the professional programme elements. As well as young people, who will also be invited to participate in the event, providing them with interactive, playful education, strengthening their sense of responsibility and commitment to protect our planet. The indirect target group of the development is all EXPO visitors, from young people to adults, who will be able to obtain a wide range of information on sustainability, environmental awareness and the fight against climate change at the exhibitors' stands.

Agenda:

Day 1 (02/10/2024)

Arrival of twin city delegations in the afternoon

Evening dinner for the twin city delegations at the accommodation

Day 2 (03/10/2024)

Breakfast for the twin city delegations at the accommodation.
